(Taught at the San Francisco school)

## 9 Tooth Rake Form

1pm-2:30pm

This forgotten, but practical, traditional weapon is rarely taught or seen these days. In the Monkey King tales, the Pig is seen carrying this effective weapon. Be the first to learn and perform this flashy form as it has never been taught before.

\*Any good quality rake from a hardware store is fine.

## Dragon Form

3pm-4:30pm

One of the most mystical and deadly of the five animals is the dragon. This rare, highly advanced form is not only beautiful to watch, but very effective as it uses slow and fast strikes to deceive its opponents. A one legged squat is performed at the end of the form to show the strength and power developed.
